SUBJECT INDEX, VOLUME 12

Acid, effect on the radiation-induced grafting of monomers to polyolefins, 225
Active polycondensation, synthesis of hydrophilic polyamide by, 355
Acrylonitrile, photopolymerization of, 327
Acrylonitrile-vinyl bromide copolymerization, chain transfer processes in, 411
Alkali-metal hydroxides, and salts, 217
Alternating diene-dienphile copolymers, 261
Anionic activation, 203
Aromatic radical cations, electrogenerated, 687
Aziridines, the reaction of/with carbon monoxide, 679
1,3-Benzene disulfonyl chloride, 319
Block polymers, from isocyanate terminated intermediates, 343
BPA polycarbonate, low temperature toughness of, 247
Butadiene-Imide block polymers, preparation of, 343
Calibration, in gel permeation chromatography, 439
Caprolactone oligomers, end-group effect on the molecular weight distribution of, 583
Carbon-13, nuclear magnetic resonance spectra, 199
Carbon tetrachloride, photopolymerization of vinyl monomers with the system, 121
Cellulose I, studies of the unit cell of, 311
Cellulose II, annealing and increased order in, 565
Cellulose fibers, polypropylene transcrystallization at the surface of, 509
Column adsorption chromatography, separation of grafting reaction product by, 27
Compression-oriented HDPE, 629
Cryptates, use in anionic polymerization, 203
Crystalline vibrational bands, a novel method for the determination of, 577
Crystalline state, a reversible topochemical process in the, 57
Crystallization, induced by, 419
Curing kinetics, in polymer composites, 473
Cyclopentadiene, copolymerization of, 261
Debye Lattices, Relaxation of damped, 1
Diester with diamine, charge-transfer polycondensation of, 711
Dimerization of vinylcarbazole, products in, 545
Dimethylaminophenyl isocyanates, synthesis and polymerization of, 529
Diphenyl phosphite, in pyridine, 185
Dispersion, in gel permeation chromatography, 439
2,5-Distyrylpyrazine(DSP), photopolymerization of, 57
Electron Microscopy, use of, 459
Elemental fluorine, and the controlled reaction of hydrocarbon polymers, 177
Equimolar Copolymers, sequentional structure of, 31
ESCA, the use of x-ray photoelectron spectroscopy, 161
Ethylene oligomerization, with Ziegler-type catalysts rate constants of β-hydrogen abstraction, 39
N-Ethylmaleimide, copolymerization with, 665
Free-radical polymerization, determining the rate of initiation, 399
Gas chromatography, Studies on polymer stationary phases by, 231
Gel permeation chromatography, concentration effects in, 277
Glass transition temperature, 31
Grafting Reaction Product, separation by adsorption column chromatography, 27
Helix-coil transition, 597
Heterogeneous polymerization of olefins, 561
Hexamethyldisilazine, the thermal degradation of poly[ethylene methylene bis(4-Phenyl carbamate)] by, 65
Hydrocarbon polymers, the controlled reaction of, 177
Hydrophilic polyamide, synthesis of/and by active polycondensation, 355
Integrated intensities of HR-NMR Spectra, 349
Ionene template, matrix polymerization on, 651
Ionization, effect of and on the dielectric

behavior of a polycondensate, 319
Isomeric aliphatic copolymers, synthesis and characterization of, 381
Isomeric structure, distribution of cis-trans equibinary poly(butadiene), 305
Isotactic polystyrene, 419
Maleic anhydride, copolymerization of, 261
Manganese ions, stabilizing action of, 723
Mannich base polymer, intramolecular charge transfer complex in, 139
Mechanochemical polymerization, 623
Methacrylol-L-proline methyl ester, photocopolymerization of, 503
Methyl Methacrylate, radical polymerization of/with Ferrocene and Carbon Tetrachloride, 21
Methylene ^{1}H NMR Spectra, 49
Molecular weight distribution, method for determining the rate of initiation, 399
N-protected peptides, the synthesis of, 719
Neutron diffraction studies, unit cell of cellulose I, 311
o-Nitrophenylsulfenyl N-carboxy-α-amino acid anhydrides, use of, 719
NMR, spectroscopic studies on the complex of acrylonitrile, 153
Nomenclature, in thermal analysis, 523
Nylon 6,6, photolysis of thermally oxidized, 477
TiO_2 photosensitized degradation of, 723
α-Olefins with BF_3 complexes of acrylate esters, polymerizations of, 129
Ozone, a study of attack on elastomer surfaces, 281
Paramagnetic species, the production of, 45
Pendent vinyl groups, thermal reaction of, 89
Peracid type resin, synthesis of, 681
Phase separation, in flowing polymer solutions, 267
in diblock copolymers of styrene and α-methyl styrene, 591
Phenylacetylene, copolymerization of, 665
PMMA main chain scission, ESR study on, 609
Polarized Raman scattering, 433
Polyathioureas, from carbon dioxide, 517
Poly-γ-benzoylbenzyl-L-glutamate, photosensitizing ability of, 287
Polybutadiene, derivative of testosterone, 447
1,4-Polybutadiene, determination of sequence distribution in, by ^{13}C-NMR spectra, 369
Polycaprolactone, preferential adsorption of low-molecular-weight on $CaCO_3$, 147
Poly(chloroprene), autoxidation of uncompounded, 467
Polycyclic hydrocarbons, solutions of alkali metals and their complexes, 211
Polyelectrolyte complex, the formation of, 651
Poly-DSP, thermal depolymerization of, 57
Poly[ethylene methylene bis(4-phenyl carbamate] the thermal degradation of by hexamethyldisilazine, 65
Poly(Ethylene Terephthalate), Interpretation of the vibrational spectra of, 13
Polyethylene, radiation crosslinking of, 387
terephathalate fibers, 433
terephthalate, morphology studies on solvent induced crystallization of, 113
Poly(hexamethylenealklmalonamides), polyamides with long side chains, 129
Polyhexamethyleneurea, synthesis via a silyated intermediate, 641
Poly(4-Hydroxy-3,5-di-t-butylphenyl glycidyl thioether), synthesis of, 557
Polyimide membranes, structure and hyperfiltration properties of, 697
Polyisoprene, derivative of testosterone, 447
Polymer, celenium containing, 679
Polymers, a new mechanism of failure in, 81
Poly(methyl acrylate), measurement of tetrad configurations, 635
Polymer-pigment interface, 455
Poly(N-vinylcarbazole), orientation of films of, 69
Polyoctenamer, thermal rearrangements in, 295
Polypentenamer ^{13}C NMR spectra of, 85
thermal rearrangements in, 295
Propylene, the emulsion copolymerization of tetrafluoroethylene with, 95
Polypropylene melt, 645
Polypropylene molecules, ESR evidence for main-chain scissions of, 193
Polypropylene phosphorescence, effects of thermal oxidation on, 253
Polystyrene, plasticized, 1
initiation of photooxidation by solar radiation, 497
Polystyrenes, methyl substituted, 199
Polyureas, from carbon dioxide, 517
Poly(vinyl acetate), microstructure of emulsion particle by electron microscopy, 459
Poly(vinylidene chloride), pyrolysis in

N-methyl-2-pyrrolidone solution, 45
Pore diffusion, as a rate influencing factor, 561
Propiolaldehyde, polymerization of, 167
Proton dipolar broadening, in solid copolymers, 339
PVC, Adsorbed on $CaCO_3$, 7
direct measurement of, 7
Pyridines, studies on reactions of N-Phosphonium salts of, 185
Radiation crosslinking of polyethylene, 387
Radiation-induced polymerization, products in, 545
Reactive polypeptides, 715
Regenerated cellulose, the derivation of biaxially oriented sheets, 221
Rubber, triboluminiscence of, 573
Schiff bases, copolymerization with acrylonitrile, 451
Segmental interpenetrations and entanglements, 549
Secondary dispersions of polymers, relationship between the temperature positions of, 569
Short silicone blocks, effect of, 247
Solar radiation, initiation of photooxidation of polystyrene, 497
Solid copolymers, multiple-pulse reduction of, 339
Spin-trapping technique, 407
Stannic chloride, and cationic polymerization of styrene, 391
Styrene, cationic polymerization by Stannic chloride, 391
Styrene, cationic polymerization of, 687
Stereoregular poly(methyl methacrylate) effect of association of, 349
Sulfonium salt, free-radical polymerization by, 395
Testosterone, derivatives of, 447
Tetrafluoroethylene, the emulsion copolymerization of, 95
H_2O_2 photosensitized emulsion polymerization of, 143
Tetraphenyl porphine-iron (III), photopolymerization of vinyl monomers with the system, 121
Thermal analysis, nomenclature in, 523
Thermal cyclization, type II, 615
Thermal decyanation, 659
Thiocarbonyl groups,
Titanium dioxide pigments, effect of, 241
Trans-1,4-polychloroprene, a Fourier transform infrared spectroscopic study of, 577
Transcrystallization, on a polypropylene melt, 645
Transient optical spectra, solvent effects on, 545
Trichloroacetic acid, cocatalysis of, 391
Universal calibration, comparison of column behavior for same polymer in different solvents, 331
N-vinylhalogenocarbazole, synthesis of, 257
Vinyl Isopropyl ether, 73
Vinyl monomers, photopolymerization of, with the system-tetraphenyl porphine-iron (III), amine, and carbon tetrachloride, 121
Vinyl polymerization, 21
Zinc diethyl-cumene hydroperoxide, initiator system studied, 407
